

# BACHELOR OF SCIENCE IN CHEMICAL ENGINEERING (BSChE) DEGREE

The program leading to the BS in Chemical Engineering is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Chemical, Biochemical, Biomolecular and Similarly Named Engineering Criteria.

## Program Learning Outcomes (Student Outcomes) for the BSChE Degree

Upon completing the BSChE degree, students will be able to demonstrate:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## Program Educational Objectives for the BSChE Degree

Within 3 to 5 years of graduation, graduates with a Bachelor of Science in Chemical Engineering (BSChE) degree are expected to be:

1. Graduate students, professionals, and entrepreneurs who are moving towards leadership positions as exemplary members of the global workforce; and
2. Professionals who practice their societal, environmental, and ethical responsibilities.

## Requirements for the BSChE Degree

For general university requirements, see [Graduation Requirements \(https://ga.rice.edu/undergraduate-students/academic-policies-procedures/graduation-requirements/\)](https://ga.rice.edu/undergraduate-students/academic-policies-procedures/graduation-requirements/). Students pursuing the BSChE degree must complete:

- A minimum of 95 credit hours to satisfy major requirements.
- A minimum of 127 credit hours to satisfy degree requirements.
- A minimum of 16 courses (48 credit hours) taken at the 300-level or above.

- The requirements for one area of specialization (see below for areas of specialization). When students declare the major (<https://ga.rice.edu/undergraduate-students/academic-opportunities/majors-minors-certificates/#text>) in Chemical Engineering (associated with the BSChE degree), students must additionally identify and declare one of five areas of specialization, either in:

- Biomolecular Engineering (p. 2), **or**
- Computational Engineering (p. 3), **or**
- Energy/Sustainability (p. 3), **or**
- Materials/Nanotechnology (p. 3), **or**
- Engineering Breadth (p. 4) (Engineering Breadth is an area of specialization comprised of electives from a mix of engineering disciplines).

Because of the common core requirements, it is possible for students to change their area of specialization at any time, even after initially declaring the major. To do so, please contact the [Office of the Registrar \(registrar@rice.edu\)](mailto:registrar@rice.edu).

The courses listed below satisfy the requirements for this major. In certain instances, courses not on this official list may be substituted upon approval of the major's academic advisor, or where applicable, the department's Director of Undergraduate Studies. (Course substitutions must be formally applied and entered into Degree Works by the major's [Official Certifier \(https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/\)](https://registrar.rice.edu/facstaff/degreeworks/officialcertifier/).) Students and their academic advisors should identify and clearly document the courses to be taken.

## Footnotes and Additional Information

<sup>\*</sup> **Note:** University Graduation Requirements include 31 credit hours, comprised of Distribution Requirements (Groups I, II, and III), FWIS, and LPAP coursework. In some instances, courses satisfying FWIS or distribution requirements may additionally meet other requirements, such as the Analyzing Diversity (AD) requirement, or some of the student's declared major, minor, or certificate requirements. Additional Credit Hours to Complete Degree Requirements include general electives, coursework completed as upper-level, residency (hours taken at Rice), and/or any other additional academic program requirements.

<sup>1</sup> MATH 221 and MATH 222 may substitute for MATH 212.

<sup>2</sup> The Chemical and Biomolecular Engineering department has determined that credit awarded for PHYS 141 *CONCEPTS IN PHYSICS I* is not eligible for meeting the requirements of the Chemical Engineering major.

<sup>3</sup> The Chemical and Biomolecular Engineering department has determined that credit awarded for PHYS 142 *CONCEPTS IN PHYSICS II* is not eligible for meeting the requirements of the Chemical Engineering major.

## Areas of Specialization

Students must complete the requirements as listed for one of the following areas of specialization for the BSChE degree program. A minimum of 4 courses (minimum of 12 credit hours) must be taken from one of the areas of specialization as listed below.

**Please Note:** The following list of approved courses can be used to satisfy the requirements of the area of specialization. Courses not on the list may be taken upon approval of the academic advisor. Students and their academic advisors should identify and clearly document the courses to be taken.

### Area of Specialization: Biomolecular Engineering

To fulfill the BSChE degree requirements, students pursuing the Biomolecular area of specialization must complete:

- 1 course (3 credit hours) from the area of specialization Core Requirement
- 3 courses (9 credit hours) from the area of specialization Elective Requirements

Code	Title	Credit Hours
<b>Core Requirement</b>		
CHBE 415	SEPARATION TECHNOLOGIES FOR CHEMICAL AND BIOMOLECULAR PROCESSES	3
<b>Elective Requirements</b>

BIOS 201	INTRODUCTORY BIOLOGY I	
BIOS 301	BIOCHEMISTRY I	
BIOE 321	CELLULAR ENGINEERING	
BIOE 330	BIOREACTION ENGINEERING	
BIOE 370	BIOMATERIALS	
BIOE 372	BIOMECHANICS	
BIOE 420 / CHBE 420	TRANSPORT PHENOMENA IN BIOENGINEERING	
BIOE 422	GENE THERAPY	
BIOE 464	EXTRACELLULAR MATRIX	

BIOE 485 / COMP 485 / ELEC 485	FUNDAMENTALS OF MEDICAL IMAGING I
BIOE 508 / SSPB 503	SYNTHETIC BIOLOGY
BIOE 620 / CHBE 620	TISSUE ENGINEERING

**Total Credit Hours** 12

#### Area of Specialization: Computational Engineering

To fulfill the BSChE degree requirements, students pursuing the Computational Engineering area of specialization must complete:

- 1 course (3 credit hours) from the area of specialization Core Requirement
- 3 courses (9 credit hours) from the area of specialization Elective Requirements

Code	Title	Credit Hours

CMOR 416 / ELEC 489 / NEUR 416	NEURAL COMPUTATION	
CMOR 430	ITERATIVE METHODS FOR SYSTEMS OF EQUATIONS AND UNCONSTRAINED OPTIMIZATION	
CMOR 435 / MATH 435	DYNAMICAL SYSTEMS	
CMOR 441	LINEAR AND INTEGER PROGRAMMING	
CMOR 518	APPLICATIONS IN COMPUTATIONAL MATHEMATICS	
<b>Total Credit Hours</b>		12

#### Area of Specialization: Energy/Sustainability

To fulfill the BSChE degree requirements, students pursuing the Energy/Sustainability area of specialization must complete:

- 1 course (3 credit hours) from the Core Requirement
- 3 courses (9 credit hours) from the area of specialization Elective Requirements

Code	Title	Credit Hours

MSNE 302	MATERIALS PROCESSING AND NANOMANUFACTURING	
MSNE 401	THERMODYNAMICS IN MATERIALS SCIENCE	
MSNE 402	MECH PROPERTIES OF MATERIALS	
MSNE 406	PHYSICAL PROPERTIES OF SOLIDS	
MSNE 411	MATERIALS CHARACTERIZATION FROM NANO TO MACRO	
MSNE 415	CERAMICS AND GLASSES	
MSNE 433	COMPUTATIONAL MATERIALS MODELING	
MSNE 435	CRYSTALLOGRAPHY & DIFFRACTION	
MSNE 523	PROPERTIES, SYNTHESIS AND DESIGN OF COMPOSITE MATERIALS	

**Total Credit Hours** 12

### Area of Specialization: Engineering Breadth

To fulfill the BSChE degree requirements, students pursuing the Engineering Breadth area of specialization must complete:

- 1 course (3 credit hours) from the area of specialization Core Requirement
- 3 courses (9 credit hours) from the area of specialization Elective Requirements

Code	Title	Credit Hours

**Total Credit Hours** 12

### Footnotes and Additional Information

- <sup>1</sup> A maximum of 3 credit hours for CHBE 495, CHBE 498, or CHBE 499 may replace 3 credit hours of any of the discipline electives above, but not the Core Requirement.

## Policies for the BSChE Degree

### Program Restrictions and Exclusions

Students pursuing the BSChE degree should be aware of the following program restriction:

- As noted in *Majors, Minors, and Certificates* (<https://ga.rice.edu/undergraduate-students/academic-opportunities/majors-minors-certificates/>), under *Declaring Majors, Minors and Certificates*, students may not obtain both a BA and a BS in the same major. Students pursuing the Bachelor of Science in Chemical Engineering (BSChE) Degree may not additionally pursue the BA Degree with a Major in Chemical Engineering.

### Transfer Credit

For Rice University's policy regarding transfer credit, see [Transfer Credit](https://ga.rice.edu/undergraduate-students/academic-policies-procedures/transfer-credit/) (<https://ga.rice.edu/undergraduate-students/academic-policies-procedures/transfer-credit/>). Some departments and programs have additional restrictions on transfer credit. The Office of Academic Advising maintains the university's official list of transfer credit advisors (<https://oaa.rice.edu/advising-network/transfer-credit-advisors/>) on their website: <https://oaa.rice.edu>. Students are encouraged to meet with their academic program's transfer credit advisor when considering transfer credit possibilities.

### Departmental Transfer Credit Guidelines

Students pursuing the BSChE degree should be aware of the following departmental transfer credit guidelines:

- Requests for transfer credit will be considered by the program director (and/or the program's official transfer credit advisor) on an individual case-by-case basis.

## Additional Information

For additional information, please see the Chemical and Biomolecular Engineering website: <https://chbe.rice.edu/>

## Opportunities for the BSCHE Degree

### Academic Honors

The university recognizes academic excellence achieved over an undergraduate's academic history at Rice. For information on university honors, please see Latin Honors (<https://ga.rice.edu/undergraduate-students/honors-distinctions/university/>) (*summa cum laude*, *magna cum laude*, and *cum laude*) and Distinction in Research and Creative Work (<https://ga.rice.edu/undergraduate-students/honors-distinctions/university/>). Some departments have department-specific Honors awards or designations.

### Fifth-Year Master's Degree Option for Rice Undergraduate Students

In certain situations and with some terminal master's degree programs, Rice students have an option to pursue a master's degree by adding an additional fifth year to their four years of undergraduate studies.

Advanced Rice undergraduate students in good academic standing typically apply to the master's degree program during their junior or senior year. Upon acceptance, depending on course load, financial aid status, and other variables, they may then start taking some required courses of the master's degree program. A plan of study will need to be approved by the student's undergraduate major advisor and the master's degree program director.

As part of this option and opportunity, Rice undergraduate students:

- must complete the requirements for a bachelor's degree and the master's degree independently of each other (i.e. no course may be counted toward the fulfillment of both degrees).
- should be aware there could be financial aid implications if the conversion of undergraduate coursework to that of graduate level reduces their earned undergraduate credit for any semester below that of full-time status (12 credit hours).
- more information on this *Undergraduate - Graduate Concurrent Enrollment* opportunity, including specific information on the registration process can be found here (<https://ga.rice.edu/undergraduate-students/academic-opportunities/undergraduate-graduate-concurrent-enrollment/>).

Rice undergraduate students completing studies in science and engineering may have the option to pursue the Master of Chemical Engineering (MChE) degree. For additional information, students should contact their undergraduate major advisor and the MChE chair of the department graduate studies committee.
