MINOR IN DATA SCIENCE

Program Learning Outcomes for the Minor in Data Science

Upon completing the minor in Data Science, students will be able to:

1. Formulate questions in a domain that can be answered with data.
2. Use tools and algorithms from statistics, applied mathematics, and computer science for analyses.
3. Visualize, interpret, and explain results cogently, accurately, and persuasively.
4. Understand the underlying social, political, and ethical contexts that are importantly and inevitably tied to data-driven decision-making.

Requirements for the Minor in Data Science

Students pursuing the minor in Data Science must complete:

- A minimum of 7 courses (22-26 credit hours, depending on course selection) to satisfy minor requirements.
- A minimum of 5 courses (15-19 credit hours, depending on course selection) taken at the 300-level or above.
- 1 course (3-4 credit hours, depending on course selection) to satisfy the Prerequisite.
- 4 courses (12-14 credit hours, depending on course selection) to satisfy the Core Requirements.
